

Mobilize America

The Photo to the left (*circulated by major newspapers a few years ago*) Clearly Shows how the non-white immigrants feel about our beloved nation – According to them it does NOT belong to the European people who founded it. What do you think?

The Politicians Say We Need More Technology And Money to Secure our Border – What Nonsense! “Lies! Lies! Lies! The United States is the most technologically advanced country in the world. Our space program, at this very moment, is mapping the galaxies. Our top scientists are mapping the human genome. Diseases are being cured, new forms of energy are being harnessed and the politicians have the audacity to say that the United States of America can’t stop a bunch of Mexicans from running across the border! Liars! The answer to our immigration problem is simple. Put troops on the border - not as a support team for the border patrol - not as clerical workers to document who comes and who goes - not to build fences - or install cameras - or infrared heat detectors - But rather troops to do what troops are trained to do. And that my friend is to locate, target, and remove the enemy. War has been declared on our people - its time our military fights back! I am positive our brave soldiers would welcome this assignment!”
