

Health Care Reform

Obama Care – the massive, 2,801-page, multi-trillion-dollar takeover of health care – is proving a disaster. In addition to actually increasing the cost of health care for families, the bill unconstitutionally mandates that every American purchase health insurance. Instead of real reforms to reduce the cost of health care and promote patient-centered care, the ruin the best health care system in the world. By creating new layers of bureaucracy between patients and their doctors, it could lead to government rationing of medical care. We must reverse the government takeover of health care and adopt a patient-centered approach.
