The third point of The Knights Party platform is to repeal the NAFTA and GATT treaties. These laws given to us by the Democrats and Republicans are damaging to the American worker and will eventually put millions, and millions into destitute poverty. Global free trade has been praised by both Republicans and Democrats as the answer to America's economic crisis. The ultimate objective they see is a world wide web of new markets. A market in which products, services, capital, and labor can compete. A place where no country is shut out, but with every country reaping the benefits.

Global free trade may be good for giant corporations, banks and the entire integrated system of big business, but it will ultimately lead to the end of the middle class to be replaced by impoverished debt ridden White families. The very people who have historically kept the wheels of industrialized nations in motion and advancing!

Prior to NAFTA and then GATT, the majority of trade was between the western industrialized nations with the exception of Japan, which is nationalist in nature, and has competed on an even keel with U.S. and European goods.

In recent years however, an estimated 4 billion people have been added to the world economy. Some by their governments entering capitalism. These 4 billion people which are expected to reach over 6.5 billion in years ahead, hail from China, India, Vietnam, Bangladesh, and other third world countries. These nations have a very high unemployment rate and a very low standard of living. Now they are part of the world market and their biggest commodity to sell is labor.

The competition will no longer be between products but labor. Compare two companies. One in the U.S., and the one in India. Both make an identical product that will be sold in the same market. Most likely in an industrialized nation. Both products can use identical technology and have equal access to international financing. The edge that the company in India has over the company in the U.S. is the labor market. The company in India can hire 45 people for the same price that the U.S. company can hire one. The company in India will make a greater profit. GATT makes it easier... a LOT easier for the U.S. Company to take advantage of the same labor pool. When the U.S. Company moves to India they increase their profits and Americans lose their jobs.

GATT will also cause a great tragedy in the third world. It is estimated that there are still 3.1 billion people in the world who live from the land. The majority being from third world nations. Corporate farming is expecting a huge boost from GATT replacing small family farms. Just as the family farm in this country has slowly been disappearing and given way to the large corporate led farm, so it will happen in the places such as India and China. British financier, Sir James Goldsmith is the co-founder of the L'Autre Europe Party. Sir James Goldsmith's main agenda is the slowing of European integration and he suggests that due to GATT and the new empowerment of corporate controlled farming, more than two billion people of third world nations will lose their livelihood. He states, "Some of these GATT refugees will move to urban slums, but more will be forced into mass migration."

Where will 2 billion homeless Asians go? Where will these people go? One only has to look at the changing faces of America to know the answer. While GATT will give large corporations and their related industries such as international banks and financial families such as the Jewish Rothchild family more control over the finances and politics of nations who are indebted to them, it will only take from the middle class.

While it is touted as capitalism it is too similar to Marxism/Communism. Take from the middle class, even the upper middle class, and give it to the poor. While no sincere Christian should have any qualms about helping the poor, GATT does not do that. Just like Communism, the new economic policies such as NAFTA and GATT propose to boost the living standard of third world nations and eventually raise the standard of developed nations.

Forcing everyone into the under class is only beneficial to large international corporations and their banking cohorts such as the privately owned Federal Reserve. Rather than a targeted government in some place such as Moscow drawing up the plans for wealth redistribution where an elite control the nation and the new under class does their bidding, this economic terrorism does all the work instead.

An international web of high financiers will control the wealth and the ones who control the wealth control the politicians and the nation. Free trade is only good for greedy politicians!

When the Republicans and Democrats say that GATT will eventually be good for America, what they really mean is that it will eventually be good for them. Are they naive? Do they really not understand the international game that is being played? One where the middle class White families are the pawns? No, they are not naive. They are not stupid. They know who is dealing the cards, and they want part of the winnings.

For their silence, for leading Americans down the wrong path, for sidestepping the issues, for misinforming and lying to the public, they are hoping for a payoff. A better paying job now, a bigger pension, bigger campaign contributions, and a lavish lifestyle. To be with the "in crowd" and the elite making the financial decisions of the nation, perhaps a boost in their political career down the road.

While claiming to support family values, they throw the unsuspecting public a few token crumbs. Let's try to get prayer back in schools, the Republicans say, even opening the new Republican Congress with a prayer. The Democrats want to help the elderly, the poor, the students who need money for school. The parties throw a few crumbs here and there and litter their speeches with talk about affirmative action. Illegal immigration. Abortion. Homosexuality. Each one adjusting their speech and opinions to the current mood of the public-- but they are not sincere.

Where is their support of the White Christian family? Without the support of the White Christian family, the backbone of America, this nation will cease to be a nation of liberty and freedom, but rather a third world nation with the visual trappings of a modernized developed country. With the success of GATT our country will be leveled to that of India. GATT induced mass migrations of non-White will bring more taxes and more crime. With the high financed influential pro-immigration groups operating their control over Washington D.C., the current immigration problems we have with Mexico may be just the tip of the iceberg when compared to several billion people looking for handouts from you. With so many new non-White "Americans" do you really think the politicians will even attempt to represent you?

Is America headed for utter destruction? We realize that an awfully frightening picture has been painted for you. A country indebted to international finance. Huge corporate monopolies with politicians in their pocket. The loss of millions of jobs and homes, and mass migrations of hundreds of millions of non-Whites coming to our shores. With the politicians rolling out the red carpet while the White family is swept underneath and left to pay for the world's non-White homeless. White Christian families fighting to survive the outrage that will surely arise when the hordes of non-White immigrants discover that we have already given everything we have and we have no more. It sounds devastating and it could very well be.

The point is that the politicians are not stupid. They know all this, but they figure by that time, 20 or 30 years down the road, they will either have died of old age, be financially secure due to their betrayal, or like Clinton,

honestly likes the multicultural mess. No, the politicians are not stupid. They are just plain and simple traitors. Nothing more and nothing less.

This is something you need to remember each and every time you see some song and dance by the Republicans or Democrats. Pick one. It does not matter. They just go about it differently. The result will be the same. The end of the White Christian family. Their talks may sound so sincere, they may kiss a thousand babies, and say a thousand grand prayers in public. When they stopped defending you they started betraying you. GATT is just a tool. It appears a very effective tool, but none the less a tool to wreak havoc on the nation.

The Democrats are not going to save America. For those of you who get so excited about the thought of a Republican congress and how they are ushering in a new Christian era... Don't let yourself be fooled. If they really supported America and the White Christian people who created it, they would outlaw and smash the privately owned Federal Reserve. They would place hundreds of thousands of troops on the Mexican borders with guns and ammo and even pass them out to White Christians with orders to stop the wave of hate crimes against White families.

Is there hope for America? We are under siege now. We are under attack today. It is only the beginning and a lot can happen before our enemies can claim a victory over our people. Now is not the time to be discouraged. Although the future may look bleak, it is only bleak if they win. If they have their way. If our people cower and give up. Let someone else worry about it. Assume the problem is too large or more than you can handle. That it just is not the right time for the White Christian children of Jesus Christ to win. It is always the time for Christ to be victorious. It is never the wrong time, too tough, too demanding, too overwhelming, too hard, or too grueling. It is just not possible for anything to be out of our reach. God has given us the power to win, to smash, and conquer the enemy who would destroy our people.

The enemy's attack will only strengthen our people! As stated above, GATT will have devastating effects on our people. Most of the insane policies out of Washington, D.C. will have devastating effects on our people. Through devastation, through the need to survive, through the need to preserve our heritage, culture, faith, and our children we will unite as a people. The Bible says that the tools of the enemy will be taken and used by his people against the enemy. The politicians will not succeed in destroying us. Already our people are uniting in defiance.

The Knights Party is the face of the movement. We are men and women who see the politicians in Washington, D.C. for the whores that they are and their respective parties for the brothels that they have turned them into. The lives and future of our Children, they wish to sell for a profit. Through the uniting of White Christian men and women nation wide, we will speak with one voice. A voice crying out to the masses to join with us. Support the crusade to save America, and your children from destruction. We will not become an under class third world nation in the very country given to us through manifest destiny. We will not go, and they will take it from us. The Knights Party will raise the standard. We will unite the people. We will expose the enemy and through Jesus Christ our King we will conquer and prevail.
