The fourth plank of The Knights Party platform is to put America FIRST in ALL foreign matters. The first and only concern of the Federal government should be for the welfare of citizens of the United States of America- Not for citizens of another country. Your sovereign rights as an American are inalienable and irrevocable, and as such our civil rights must not be used as bargaining chips in foreign policy decisions. We see this happening every day, yet nothing happens. No politician will move to help America, or Americans. If you think that your rights and welfare as an American are not being traded away for international favors, one need only look at the sad case of the North American Free Trade Agreement. There are of course, similar international trade laws which give large tax credit incentives for American industries to move the base of manufacturing outside of the country.

Americans everywhere are convinced that the Federal government is only ever on guard to protect American rights and interests, but this is not the truth and deception and treachery are abound. The officially stated goals of the foreign policy of the United States, as seen in the Foreign Policy Agenda of the U.S. Department of State are "to create a more secure, democratic, and prosperous world for the benefit of the American people and the international community." As clearly stated by the official foreign policy agenda we can see that the Federal government has placed concerns and interests of the international community on the same level as Americans! The only concern of the Federal government should be putting America, and American citizens FIRST in all interests.

One example of this is in America's extradition treaty with Mexico. Mexico will not extradite criminals to America if the offender will face the death penalty. Politicians must not make concessions with foreign countries, thus placing the interests of their citizens over our established law. More recently, in the high profile case of Cesar Laurean, we can see why it is ludicrous to allow treaties which defeat established law in America. Cesar Laurean is accused of the murder of Marine Lance Corporal Maria Lauterbach. Maria Lauterbach was late in her third trimester of pregnancy when she was murdered. Her body was mutilated, burned, and then buried in a shallow grave. The offender in this case is a naturalized citizen who fled to Mexico in hopes of escaping capture for his crimes. In time Cesar Laurean was captured and returned to Onslow County, North Carolina for trial in the murder. Cesar Laurean would not have been returned to America were it not for a pre-trial agreement between the District Attorney which presided over Onslow County and Mexican officials. It was agreed that Cesar Laurean would not face the death penalty. This is not justice for Maria Lauterbach. Her child. The Lauterbach family. The Marine Corps community. American citizens. As evidenced, the Federal government has traded away, given away, and made concessions in American sovereignty- and Americans lose.

We need not look hard to find evidence of the betrayal which Americans are experiencing at the hands of the Federal Government. In April, 2010 the Arizona Governor signed a very positive immigration enforcement bill. This bill enforces existing laws and adds real substance to controlling illegal immigration. The bill that was signed into law does not create any new laws, it merely provides the means to enforce existing laws! Unfortunately for all Arizona residents, the bill is receiving strong opposition from Washington, D.C. politicians. Barack Hussein Obama has directed that this bill be reviewed.

Attorney General Eric Holder has suggested that this bill can face a court battle with the possibility of being repealed altogether. Homeland Security Secretary, Janet Napolitano has also voiced extreme opposition to this bill. The basis of the opposition from these three traitors is one of worries over hostilities directed towards law officers and citizens, and fear that Federal funds will be used to pay for the operation of this bill. As ludicrous as it sounds, our elected officials are announcing their refusal to protect American sovereignty out of fear of violent reprisal from foreign invaders! How could any elected official voice disapproval of a law which enforces pre-existing Federal laws? How can any politician voice disapproval for a law that protects Americans from international drug traffickers? What we see in this case is that our elected officials are LITERALLY finding ways to undermine Federal immigration laws and are LITERALLY encouraging illegal aliens to become bolder in their demands for rights.

The Federal government's track record of betraying Americans by refusing to control our southern border is lengthy, and similarly troubling. As far back as 1987 the national sentiment on border town politicians and law enforcement was kept in very low regards. Periodic reports of politicians or law enforcement officers being involved with drug dealers fueled public suspicion that more corrupted American lawmen or politicians remained unexposed. Drug importers clearly benefited (as much now as they did then!) from official unwillingness to suggest sterner measures to protect America's virtually open borders. Unarguably, over (at least) the last 20 years the Federal government has maintained opposition to tighten border control and security for Americans. In spite of demands from Americans and a national momentum towards tighter immigration controls, our elected officials in the White House continue to ignore Americans and place the demands of non-citizens *before the needs of natural born citizens!* Natural born citizens, especially White Christians, see a diminishing status in America with illegal aliens receiving emergency hospital care courtesy of the American tax payer, and practically no cause to worry for eventual deportation.

While our elected officials continue to betray Americans everywhere, we want you to know that on behalf of The Knights Party- your voice is being heard! The Knights Party Headquarters staff and our nationwide network of associates work non-stop to provide advocacy and action on your behalf to tell politicians that your sovereign rights, and privileges as Americans will not be ignored or compromised. Protect American Sovereignty with The Knights Party!
